

## Custom Social Event Planning

Creating distinct, truly custom events requires focus, attention to detail and a passion for perfection. With an in-house design department, we are dedicated to bringing each client's vision to life.

The design professionals at Encore Creative work directly with clients through all phases of conceptualization. Our use of state-of-the-art CAD technology enables us to provide comprehensive renderings that cover all aspects of the stage/set including custom built architectural pieces, lighting and drapery. This one-of-a-kind illustration of what the finished product will look like guarantees a thorough understanding of the concept.

While our designers identify what the stage/set will look like, it is our team of highly skilled fabricators that bring it to life. Collectively, these master's level designers, carpenters, electricians, welders, metal workers, sign makers, lighting designers and expert seamstresses have a strong background in custom fabrication that is rooted in theater, retail and museum design.
